

SPRING COLD START

JUMP START SPRING SOILS

Availability of essential nutrients from cold soils is a waiting game requiring more time than you can usually allow. Jump start your soils for early season performance and build the strongest turf.

■ SOIL ENERGIZER

P-48 is a soil charging major and micro nutrient product with a high phosphorous analysis for root initiation and pure energy.

■ CELL DIVISION

Trical 35-SP delivers extremely necessary calcium with powerful root exudate technology only from Floratine.

■ SOIL STIMULATOR

Maxiplex's highly concentrated humic acids promote nutrient availability and stimulate microbial activity.

■ TRANSPIRATION AND TRANSLOCATION

Quad K offers immediately available soil potassium for driving nutrient flow and transpiration.
