

GRO-POWER® PREMIUM GREEN® 10-0-10 30 / HA

40% Nitrogen derived from Methylene Ureas (MU)

25% Humus • 30% Humic Acids • 3% Iron with Micronutrients

Gro-Power® Premium Green® 10-0-10 30/HA was developed for greens, tees, fairways, sportsfields, racetracks, and general turf or landscape areas where no additional phosphorus is needed.

This premium grade high potassium fertilizer/soil conditioner was specifically designed to enhance and increase the micro-biological environment by adding a high concentration of Humic Acids (30%). Humic Acids will react on the soil to help condition it and produce an environment in which the plant can achieve maximum results.

This homogeneous formulation provides a Nitrogen-Potassium ratio (1:1) with 40% of the Nitrogen from slow release methylene ureas (MU). This product provides high levels of potassium for increased summer durability, disease resistance and winter hardiness. Three percent (3%) non-staining iron and micronutrients have been included. A Soil Penetrant has been added to maximize water percolation into the soil profile.

NO CHLORIDES • NO SEWAGE OR SLUDGE • NO ANIMAL OR POULTRY MANURE

WILL NEVER LAYER OR BUILD UP IN SOIL OR GREENS MIX
