

GRO-POWER® 10-2-5 35/HA

40% Nitrogen derived from Methylene Ureas (MU)
30% Humus ■ 35% Humic Acids ■ 2% Iron with Micronutrients

Gro-Power® 10-2-5 35/HA was developed for greens, tees, fairways, roughs, sportsfields, racetracks, and general turf or landscape areas.

This clean, unique, multi-purpose homogeneous fertilizer/soil conditioner product was specifically designed to enhance and increase the micro-biological environment by adding the highest concentration of Humic Acids (35%) of any Gro-Power® Premium Green® product. Humic Acids will react on the soil to help condition it and produce an environment in which the plant can achieve maximum results.

This homogeneous formulation provides an NPK ratio (5-1-2) with 40% of the Nitrogen from slow methylene ureas (MU). Phosphorous was added to insure sufficient amounts for healthy roots. The potassium sulphate will help provide increased disease resistance, summer durability and winter hardiness. 2% sulphur, non-staining iron and micronutrients have been included. A Soil Penetrant has been added to maximize water percolation into the soil profile.

NO CHLORIDES • NO SEWAGE OR SLUDGE • NO ANIMAL OR POULTRY MANURE

WILL NEVER LAYER OR BUILD UP IN SOIL OR GREENS MIX
