

GRO-POWER® PREMIUM GREEN® 6-2-10

40% Humus • 8% Humic Acids • 1% Soil Penetrant • 1% Iron • 4% Sulphur with Micronutrients

Gro-Power® Premium Green® 6-2-10 is a unique multi-purpose homogeneous fertilizer/soil conditioner. This product, using Gro-Power®'s new advance Matrix® technology has been developed for greens, tees, bowling greens, sportsfields, and any other areas where fine-bladed Bent, Hybrid Bermuda, Zoysia, St. Augustine and other turf varieties are utilized. The particle size will ensure even distribution, rapid penetration into the root zone and minimum mower pick-up.

This formulation provides an NPK ratio (3-1-5) that will provide optimum results. Phosphorus was added to insure sufficient amounts for deep healthy roots. The high potassium level will help provide increased disease resistance, summer durability and winter hardiness. A high analysis, long lasting non-staining iron, along with sulphur, has been added to help produce dark green color and control the pH. A soil penetrant has been added to maximize water percolation into the soil profile.

The basic material in Gro-Power® Premium Green® 6-2-10, as in all Gro-Power® products, is Humus. Humus promotes bacterial propagation which tends to improve soil structure, helps to increase the moisture-holding capacity, and helps in breaking up compacted soils. Gro-Power® Premium Green® 6-2-10 also includes Humic Acids. Humic Acids tend to act upon the soil to condition it and help produce an environment in which the plant can achieve maximum results.
